PROFILE SUMMARY

Results-driven .NET Developer with 4 years of professional experience in developing enterprise and government web applications using ASP.NET MVC, .NET Core, C#, SQL Server, React.js, and Web API. Experienced in backend development, REST API integration, ERP systems, database optimization, and application performance enhancement. Worked on large-scale projects including MahaMetro, Pune Metro, Thane Metro, and MahaGenco.

SKILLS

Backend: C#, ASP.NET MVC, .NET Core, Web API, Entity Framework, LINQ, Repository Pattern, Dependency Injection, JWT Authentication

Frontend: React.js, JavaScript, jQuery, Bootstrap, HTML5, CSS3

Database: SQL Server, Stored Procedures, Query Optimization

Tools: Git, Postman, Visual Studio 2022, IIS Deployment

Other: REST API Integration, ERP Modules, Application Troubleshooting, Performance Optimization, SDLC, Agile Methodology

EXPERIENCE

ITCRAFT Technologies Private Limited

.NET Developer | Dec 2023 – Present

- Developed and maintained enterprise-grade web portals for MahaGenco, Pune Metro, Thane Metro, and Nagpur Metro using ASP.NET MVC, .NET Core, SQL Server, and React.js.
- Worked onsite at MahaMetro on DigiMahaMetro and CDE Platform projects using .NET Core and React.js.
- Mentored junior developers through code reviews, task guidance, technical support, and issue resolution.
- Optimized SQL stored procedures and improved database performance for enterprise applications.
- Developed and consumed RESTful APIs for enterprise applications.

Pratham Softcon Pvt. Ltd.

Junior .NET Developer | Jul 2023 – Dec 2023

- Developed an NGO e-learning platform with LMS, hosting, and user management functionalities.
- Migrated the application from VB.NET to ASP.NET MVC and redesigned the frontend using React.js.
- Integrated REST APIs and improved application performance and user experience.

zOrder Pvt. Ltd.

Junior .NET Developer | Mar 2023 – May 2023

- Provided technical support and maintenance for Retail ERP software used by store clients.
- Resolved issues related to billing, inventory management, and reporting modules.
- Improved application reliability by fixing backend logic and SQL-related issues.

eSankalp Software

.NET Trainee | Jun 2022 – Mar 2023

- Assisted in frontend and backend development for multiple web applications.
- Worked on feature enhancements, bug fixing, and SQL Server data handling tasks.
- Supported application testing, debugging, and maintenance activities.

PROJECTS

DigiMahaMetro

Client: MahaMetro

Role: Backend Developer

Tech Stack: ASP.NET Core, Web API, SQL Server, React.js

- Worked on backend development for the DigiMahaMetro enterprise application at MahaMetro.
- Developed and maintained REST APIs using ASP.NET Core and SQL Server.
- Implemented 3-Tier Architecture for scalable and maintainable application development.
- Created and optimized SQL stored procedures, queries, and database operations.
- Performed bug fixing, backend enhancement, and application performance optimization.
- Collaborated with frontend developers for API integration and smooth system functionality.

CDE Platform

Client: MahaMetro

Role: Database Developer

Tech Stack: SQL Server, ASP.NET Core

- Worked on database development and management for the CDE Platform project.
- Designed and created database tables, relationships, and SQL stored procedures.
- Managed backend database operations and query optimization.
- Performed database troubleshooting, debugging, and data handling tasks.
- Supported application backend processes and ensured database performance and reliability.

ACHIEVEMENTS

- Worked onsite at MahaMetro for enterprise application development.
- Developed scalable backend APIs using ASP.NET Core and SQL Server.
- Optimized SQL stored procedures for enterprise applications.
